Finland

Attention: Veka Ohtamaa

Dear Mr. Ohtamaa:

Environmental Enterprises USA, Inc. completed NCP Revised Standard Dispersant Toxicity Tests with ORS-Sorb following the method in Appendix C of Part 300, under Subpart J – Use of Dispersants and Other Chemicals, § 300.905 NCP Product Schedule, § 300.915 Data Requirements (FR 47453, Sept. 15, 1994). The sample, ORS-Sorb, was supplied by OY Operative Recovery Solutions JMR Ltd and the tests were completed with representative subsamples, using generally accepted laboratory practices, and I believe the results to be accurate. The lab personnel that worked with the ORS-Sorb sample have completed NCP Revised Standard Dispersant Toxicity Tests with five products in the last 24 months.

Sincerely,

David L. Daniel
Laboratory Director
